Form 1: Current percentage (out of 100) for formula #1 without the final exam score.

Form 2: Current percentage (out of 100) for formula #2 without the final exam score.

Please see the next page for the grading policy and explanation of the formulas.

GRADING

Your grade will be based on two formulas and you will receive the higher of the two. I grade on the basis of a distribution. That is, I graph the class' numerical scores and draw the grade divisions based on how students group themselves. I use a straight scale to **guide** me in setting these grade divisions. That is

90 or higher	4.0
85-89	3.5
80-84	3.0
75-79	2.5
70-74	2.0
65-69	1.5
60-64	1.0
less than 60	0.0

Formula #1

Components: Best four scores among the four hour exams (HE) and the homework (HW) total and the final exam (FE).

Weighting: 40% FE + 15% each HE or HW

Formula #2

Components: Four hour exams (HE), the homework (HW) total, and the final exam (FE).

Weighting: 50% FE + 10% each HE and HW

Finally, I reserve the right to base your final grade solely on your final exam, if it benefits you.
