Due to the unprecedented situation where some students have some labs repeated from ME 461, there has been some outstanding questions regarding the extent to which these students must complete the Labs 1, 2, and 3. The underlying issues turn out to be rather complex, and we have consulted with the Associate Chair for Undergraduate Studies in effort to find the best policies. This email is meant to answer all of the questions.

1. For the remainder of the labs, all students must turn in a new lab short form at the end of each lab session and take the pre-lab quiz.
2. Since some students have written a long form for Labs 2 or 3, they will be required to submit a long form for Lab 1. The timetable for turning it in coincides with the other students completing the long form for Lab 2, namely, these students may turn in the rough draft one week after performing Lab 2.

We realize that some of you have alternative expectations regarding the first few labs and apologize for any confusion or misdirection. If you have any questions regarding the new policies, please discuss the situation with your TA, Profs. Jongeun Choi and Brian Feeny, or Neil Wright.
