

Informed Employee/Student Consent Statement.

I understand that this statement does not legally bind me in any way, nor does it negate any employee rights as set forth in the Employee Rights and Responsibilities handbook. I further understand that this statement of consent is required strictly as an acknowledgment that I have completed the requisite training for my particular job description at MSU and that I agree to fulfill those duties safely, to the best of my ability. Understanding this, I verify that:

1. I have reviewed the Michigan Right to Know Law videotape.

2. I have received training from ORCBS in (check those that apply):

Chemical Safety and Hazardous Waste.

Bloodborne pathogens

Radioisotope Safety

Hearing conservation

Respirator Training

3. I know where to locate and am familiar with the University's Chemical Hygiene Plan. I know where to locate the MSDS files for CMSC Laboratories.

4. I have been trained how to: a) properly label chemical containers; b) read material safety data sheets.

5. I have been informed in:

- procedures in my work area that involve hazardous waste
- physical and health hazards that the chemicals in my workplace may present
- measures I can take to protect myself from accidental overexposure to hazardous chemicals

6. I have reviewed the CMSC Safety Rules, Regulations, and Standard Operating Procedures, and I know where to locate the document.

7. I know where to locate the Hazardous Waste Disposal Guide. I understand the proper procedures for labeling and disposal of all chemical, biological, and radioactive wastes which I will encounter and/or generate. I understand that chemical wastes can be explosive if incompatible wastes are mixed. I understand that I will be required to attend an annual course on Regulated Hazardous Wastes if I routinely handle chemicals.
