

## The Division of Engineering Computing Services (DECS) Public Computer Lab Open and Close Policy

---

All of the DECS public computer labs are open at all times. The following exceptions apply:

1. **University closures.** If the University is officially closed, for events such as holidays, then the first floor computer labs will be closed and one second floor computer lab will remain open. Depending on the holiday and its proximity to a weekend, the first floor labs may be closed for the entire holiday weekend.
2. **Home football game days.** The first floor computer labs will close at 5:00pm on the Friday before a home football game day, and will reopen at 1:00pm on the Sunday following the football game day. One second floor computer lab will remain open during the home football game day.
3. **Summer sessions.** Due to reduced enrollment during the summer, various computer labs may be opened or closed as deemed appropriate by DECS. As a general rule, one first floor computer lab and one second floor computer lab will remain open during the summer sessions.
4. **Break times.** Break times are the periods between semesters and sessions, and spring break. One first floor computer lab will be open during the operating hours of the DECS Support Office. The first floor computer labs will be closed when the DECS Support Office is closed. One second floor computer lab will remain open during the entire break time.

Note: All the DECS public computer labs are subject to closure at any time for any reason. This policy is subject to change at any time.
