What is ITEC?
A nonprofit, collaborative partnership between community, business, education, and government.

ITEC’s mission is to increase technology skills of Lansing area children and adults so as to better prepare them to participate in a fast-paced, global IT-based economy.

Goals and Objectives
ITEC programs are designed for children and youth in grades K-12 and their families. The goal is to enhance/improve performance in:
- Science, technology, engineering, and mathematics
- Reading and writing
- Digital media

ITEC will also provide local access to computers and high-speed Internet in neighborhoods with little access to computer technology.

ITEC wants to play an integral role in Lansing’s high-tech economy and become a leading example of Mayor Bernero’s BEST (Business Education Science Technology) Initiative. This private-public-community partnership will be located in the former Holmes Street School.

Timetable
- Winter 2008: Building renovations [building closed]
- Summer 2008: Open ITEC location, begin programs
- Fall 2008: Grand opening
