From: Parviz Soroushian (College of Engineering Representative to University Committee on Liberal Learning)

Subject: Report of Activities – University Committee on Liberal Learning

During the 2010-2011 academic year, the University Committee on Liberal Learning (UCLL) took the following steps to maintain a campus-wide dialog focused on advancing the outcomes of liberal learning among university, college, disciplinary and co-curricular learning environments: (i) planning of efforts towards more thorough integration of liberal learning experiences into the undergraduate education and MSU; (ii) assessment of the potential for incorporating the liberal learning goals into the departmental review process; (iii) identification of the current status and the required improvements in liberal learning experiences at MSU; (iv) selection of the preferred means of reaching the targeted groups within the university to bring about the needed improvements in liberal learning; and (v) planning efforts towards development of a “Liberal Learning at MSU” web page.
