# FESTIVUS IS COMING!!!

Check out next week's issue of Spartaneering News for a schedule of events during Festivus week December 3rd - 7th

We will be running a different movie each day, free food and contests!!

**Frank Costanza:** *Many Christmases ago, I went to buy a doll for my son. I reached for the last one they had, but so did another man. As I rained blows upon him, I realized there had to be another way.*

**Cosmo Kramer:** *What happened to the doll?*  
**Frank Costanza:** *It was destroyed. But out of that a new holiday was born: a Festivus for the rest of us!*

## Student Organization of the Week: MSU Amateur Radio Club

What key has legs and can't open doors?

*A Turkey!*

The MSU Amateur Radio Club is a group for wireless/electronics experimenters, and those of all backgrounds who enjoy communicating with others around the world via two-way radio. We have been active since 1919, and have about a dozen student members, with over thirty supporting faculty/staff/alumni members.

It is a little known fact that many engineering managers and other established engineers are amateur radio operators, so when a new engineer is looking for a job, being an amateur radio operator can provide a connection through common interest. It is very simple to get licensed and be involved!

Weekly meetings are held on-air and on-internet, Sundays at

8pm. In-person meetings are held infrequently, but during the week-days there are often club members in our room, EB2121.
