$250,000 for CoRe

March 15, 2017

Consumers Energy Foundation invests $250,000 in CoRe first-year engineering experience

The Consumers Energy Foundation, a long-time supporter of the CoRe Experience first-year engineering program at Michigan State University, is contributing $250,000 to continue their support of the next generation of engineering and computer science students. The donation was announced Wednesday, March 15, in East Lansing.

MSU’s CoRe Experience is an integrated living-learning community in the MSU College of Engineering that prepares engineering students through activities that range from academic classes, to team building, strengthening interview skills, and fun seasonal celebrations.

Engineering Dean Leo Kempel said the investment from Consumers Energy gives some of MSU’s youngest students a chance to explore career options in the diverse energy industry.

“Consumers Energy is a partner from the first day a student is a Spartan Engineer all the way through full-time employment,” Kempel said. “They understand the importance of supporting MSU’s young talent through outreach and professional experiences.”

“We are pleased to build on our strong relationship with Michigan State University. We want to help provide a world-class educational experience to engineering students and give them the confidence that world-class opportunities await in our industry,” said David Mengebier, president of the Consumers Energy Foundation. “This grant and relationship exemplify our commitment to developing and retaining engineering and other talent with STEM expertise in Michigan.”

The partnership between Consumers Energy and the MSU College of Engineering currently has 34 MSU students in paid internships, who bring critical-thinking and problem-solving skills, as well as a keen willingness to learn, to their summer jobs.

Consumers Energy, which began supporting CoRe in 2010, was the program’s first corporate sponsor.
A formal celebration of the contribution will take place later in 2017 at MSU.

Consumers Energy: The Consumers Energy Foundation is the philanthropic arm of Consumers Energy, Michigan's largest utility. Consumers Energy provides natural gas and electricity to 6.7 million of the state's 10 million residents in all 68 Lower Peninsula counties. For more information, go to www.ConsumersEnergy.com

About MSU Engineering: The Michigan State University College of Engineering has nine academic departments serving more than 6,000 undergraduate and graduate students.
