

IEEE ICRA 2004

Final PDF Paper Preparation Instructions

- ✓ IEEE is very strict about the requirements for converting application files or PostScript files to full-text PDF for inclusion in IEEE *Xplore*®. Please follow the detailed instructions in “**IEEE PDF File Preparation Guide for IEEE Xplore**” that describes the essential steps in distilling PDFs that meet the IEEE requirements. The most important issue that every author shall pay attention to is to make sure that all the fonts used in your papers are **EMBEDDED and SUBSETTED**, especially for papers from Asia and Europe. The “**IEEE PDF File Preparation Guide for IEEE Xplore**” details the steps for you to check and to make sure that all fonts used are embedded and subsetted. Failure to embed and subset fonts is the biggest obstacle to PDF compliance with IEEE Xplore® and please make sure that your PDF files are compliant with IEEE Xplore®. Papers failing to meet the IEEE Xplore® PDF requirements may be rejected.
- ✓ When authors submit their final PDF papers, the PDF file names must be assigned in the format of “**paper#.pdf**”. For example, the PDF file name for paper 12345 must be assigned as “**12345.pdf**”.
- ✓ In order to have accurate and consistent information of the paper title, authors and affiliations in the Final Program (and thus the Table of Contents of the Conference Proceedings) and in the final paper PDF file, please **update** your final paper information (paper title, authors and affiliations) on the conference website as per the posted instructions when submitting the final paper PDF files.
- ✓ There will be a **conference paper digest** as part of the Conference Final Program. The paper digest must be prepared as per the **Digest Template** to achieve the best and consistent result for the conference paper digest.
- ✓ Please complete and submit the **IEEE Copyright Form** as per the instructions on the final paper submission webpage.
- ✓ For information on the latest version of PDF converting software Adobe Acrobat, visit <http://www.adobe.com/products/acrobatpro/tryout.html>.
