Michigan Energy Office Overview

It promotes energy efficiency and renewable energy to Michigan residents, businesses, non-profits, and public institutions through a variety of programs as a way to facilitate business development and community vitality in Michigan.

The Michigan Energy Office provides targeted project funding and technical assistance for projects that align with the following key priorities:

- Driving down the installed cost for renewable energy in Michigan
- Increasing accessibility to renewable energy and energy efficiency for a broad range of end-users
- Strategic deployment of renewable energy and energy efficiency across the state that leverages regional strengths and opportunities
- Cultivating public-private partnerships and knowledge-sharing to expand the impact of renewable energy and energy efficiency projects and encourage best practices
- Increasing opportunities for business investment, talent enhancement, state branding, and community vitality

Michigan Biomass Energy Program Overview
The goal of the Michigan Biomass Energy Program (MBEP) is to facilitate the sustainable production and use of energy derived from Michigan’s biomass resources as an alternative to fossil fuels. Major activities include:

- Funding demonstration projects and feasibility studies
- Funding workshops/seminars
- Education/outreach
- Technical assistance
- Building strategic partnerships
