Grading Guidelines

It has been suggested to the faculty that the following guidelines be used in assigning points on the grading of reports and presentations for the course. The following percentages should be used for each topic on the grading sheet.

100% Outstanding (Performance associated with a very-high-caliber entry-level engineer/professional)
90% Exceeds expectations
80% Meets expectations (Performance associated with an average entry-level engineer/professional)
70% Minor Deficiencies
60% Major Deficiencies (Performance associated with a below average entry-level engineer/professional)
0-50% Unacceptable
