

THIS SPRING...

ASME @ SPRINGTICIPATION - 1/28

Come see us at Springticipation this January in the STEM building! Bring a friend!

STEM, 6:30-9:30PM

ENGINEERING CAREER FAIR - 2/10 and 2/11

Connect with recruiters and seek out internships/full time roles in the Munn Ice Arena this February!

Feb. 10: Focus on Civil and Environmental Engineering

Feb. 11: Focus on all engineering majors and Computer Science.

MUNN, 3:00-7:00 PM

STAY IN TOUCH!

SEMESTER IN REVIEW

A focus for ASME this semester has been creating opportunities for members to grow their skills, experiences, and connections both within MSU engineering and professionally. ASME has hosted panels with industry professionals, member socials, a manufacturing plant visit, and even a hands-on workshop!

Missed an event? Don't worry—there's plenty more in store this upcoming spring, so be sure to stay tuned and invite your fellow MechE's! Remember this: any student is welcome to join us, no matter their membership status.

MTL WORKSHOP

In November, ASME hosted a MTL workshop to give members an introduction to the machinery that mechanical engineering majors will use later on in their academic careers. Members also got some hands-on experience with the machinery!

CONFERENCE

Five ASME Board members had the opportunity of attending an ASME conference in Philadelphia this past November. They connected with board members from other chapters, explored the city, and strengthened their team bond!

Through workshops and discussions at conference, the Board gained valuable insights and are excited to apply what they learned to continue growing and improving the MSU ASME chapter.

RIVIAN VISIT

In October, ASME welcomed industry professionals from Rivian to talk about their career paths, working at Rivian, and answer member questions. Our own Board member, Chris Neo, spoke about his internship experience and gave insight to the day-to-day work as a Rivian intern.

At the end of the presentation, the Rivian representatives allowed students to see a Rivian car up close. It was a great way to adjourn the presentation.

DICASTAL FACTORY TOUR

Last month, ASME members attended a factory tour to Dicastal in Greenville, Michigan. Our members were able to get inside information into how Dicastal is leading the way in the field of aluminum casting and CNC machining for automobile wheels.

PUMPKIN PAINTING SOCIAL

With midterms coming to an end and Halloween around the corner, we hosted a pumpkin painting social during the last week of October. Members were able to destress and hang out with fellow MechE's! Hotel Transylvania was playing in the background, and of course, cider and donuts were provided.

Featured on the left are the pumpkins of some members who attended.
