Michigan State University Bioeconomy Institute
Organic Energy Storage
Laboratory Intern Program 2020

Our summer researchers each complete an individual, supervised project. At the conclusion of the summer, they have an opportunity to give a poster presentation at a symposium.

Past employees and interns have gone on to work at national research and tech companies and many interns have chosen to continue their research at highly distinguished schools.

Please see more information at https://oesl.bioeconinst.msu.edu/

Submit:
• Résumé
• Cover letter indicating area of research of greatest interest to you
• Minimum of one reference
• List of college level science courses you have completed

Applications are due: February 15, 2020
Please email submissions and/or questions to Laura Ives at iveslaur@msu.edu

• Alternative Energy
• Organic Synthesis
• Electrochemistry
• Analytical Chemistry
