Welcome, New Spartan Engineers!

As a new MSU student, you've made the first step towards becoming a Spartan Engineer. But it is just a first step. Being admitted to the College of Engineering, succeeding academically, graduating and becoming a professional engineer are going to take a lot of effort. We’re here to help you get there.

CoRe is committed to building the “whole engineer”. By that we mean we provide opportunities to guide your success and nourish your passion for engineering through activities focused on academic, professional, and personal development. And, we do it right where you live.

CoRe immerses you in engineering from your first day on campus. By integrating academics with other activities that support your interest in engineering, we work to make it easier for you to become more engaged in learning and developing your passion – while you also develop networks of industry contacts, friends and potential future colleagues that share your interests. CoRe classes, resources, and activities are located in MSU’s South Neighborhood residence halls where most of you live – making it convenient for you… and more likely that you will actually take advantage of these opportunities and resources.

Helpful Resources

CoRe Office
W8A Wilson Hall
Office Hours on Mondays through Fridays at 8am-5pm
Phone No. 517 355 6616 ext. 2
