Welcome to the eNDE 2018 Workshop

The 23rd International Workshop on Electromagnetic Nondestructive Evaluation (ENDE2018) will be held on September 9-13, 2018, at the Detroit Marriott (the GM Renaissance Center) Hotel in Downtown Detroit, USA.

This year's technical sessions, student posters competition, industry exhibition and tour, and other special events will be coordinated by the NDE Laboratory (NDEL) at Michigan State University. We hope to provide a comprehensive and well-balanced program in theoretical and applied research of electromagnetic NDE (eNDE) methods. This workshop is intended to provide an international forum for the exchange of information on state-of-the-art technologies and development in:

- Advanced eNDE sensors and sensing systems
- Analytical and numerical modeling of eNDE
- Electromagnetics for aerospace materials
- Materials state awareness and characterization
- Advanced composite NDE methods
- Methodology in damage diagnosis and prognosis
- Inverse problems, data processing and big data applications
- Additive manufacturing and in-situ characterization
- Biomedical applications of eNDE

Through a range of technical and social activities, eNDE2018 will provide a unique opportunity to interact with the world's leading experts in electromagnetic NDE from academia, industry and government.

The international Electromagnetic Nondestructive Evaluation workshop, a.k.a. ENDE, has been held every year since 1995. Its aim is to bring together engineers and scientists from universities, research institutions, government and industry who are active in research, development and industrial applications of electromagnetic nondestructive evaluation.

The program is detailed next, make it your own and welcome you to join us in Downtown Detroit in 2018!
