

## Note on the Global Edition

The author, Hassan Khalil, was not involved in the publication of the global edition. The purpose of this note is to point out the differences between the global edition and the US (original) edition. The good news is that, except for the exercises and the page numbers, the two editions are identical.

**Exercises:** The exercises listed below in the global edition are different from the US edition. Exercises that are not listed are the same as the US edition. The author didn't write the changed exercises in the global edition.

- 1.1, 1.11, 1.13, 1.14
- 2.1, 2.2, 2.8, 2.9, 2.11
- 3.1, 3.3, 3.5, 3.7, 3.12, 3.13
- 4.6, 4.8, 4.9, 4.10, 4.11
- 5.2, 5.3, 5.13
- 6.5, 6.7, 6.8, 6.10, 6.11
- 7.1, 7.2, 7.5, 7.6, 7.10
- 8.4, 8.5, 8.7, 8.8, 8.9
- 9.1, 9.2, 9.5, 9.7
- 10.5, 10.6, 10.9, 10.11
- 11.1, 11.2, 11.8, 11.9
- 12.1, 12.4, 12.5, 12.6, 12.17
- 13.8, 13.9, 13.10, 13.11

### Page numbers:

Page number in the global edition = Page number in the US edition + 12

For example, page 13 of the global edition is page 1 of the US edition.

This is important when the errata sheet is used because it is written using the page numbers in the US edition.

**Symbols:** The list of symbols on pages 392 and 393 of the global edition refers to some page numbers. These page numbers are actually for the US edition. Add 12 to get the right page numbers in the global edition.
