Preface	xi
1 Introduction	1
1.1 Nonlinear Models	1
1.2 Nonlinear Phenomena	8
1.3 Overview of the Book	9
1.4 Exercises	10
2 Two-Dimensional Systems	15
2.1 Qualitative Behavior of Linear Systems	17
2.2 Qualitative Behavior Near Equilibrium Points	21
2.3 Multiple Equilibria	24
2.4 Limit Cycles	27
2.5 Numerical Construction of Phase Portraits	31
2.6 Exercises	33
3 Stability of Equilibrium Points	37
3.1 Basic Concepts	37
3.2 Linearization	43
3.3 Lyapunov's Method	45
3.4 The Invariance Principle	54
3.5 Exponential Stability	58
3.6 Region of Attraction	61
3.7 Converse Lyapunov Theorems	68
3.8 Exercises	70
4 Time-Varying and Perturbed Systems	75
4.1 Time-Varying Systems	75
4.2 Perturbed Systems	80
4.3 Boundedness and Ultimate Boundedness	85
4.4 Input-to-State Stability	94
4.5 Exercises	99

5	Passivity	103
5.1	Memoryless Functions	103
5.2	State Models	107
5.3	Positive Real Transfer Functions	112
5.4	Connection with Stability	115
5.5	Exercises	118
6	Input-Output Stability	121
6.1	\mathcal{L} Stability	121
6.2	\mathcal{L} Stability of State Models	127
6.3	\mathcal{L}_2 Gain	132
6.4	Exercises	137
7	Stability of Feedback Systems	141
7.1	Passivity Theorems	142
7.2	The Small-Gain Theorem	152
7.3	Absolute Stability	155
7.3.1	Circle Criterion	157
7.3.2	Popov Criterion	164
7.4	Exercises	168
8	Special Nonlinear Forms	171
8.1	Normal Form	171
8.2	Controller Form	179
8.3	Observer Form	187
8.4	Exercises	194
9	State Feedback Stabilization	197
9.1	Basic Concepts	197
9.2	Linearization	199
9.3	Feedback Linearization	201
9.4	Partial Feedback Linearization	207
9.5	Backstepping	211
9.6	Passivity-Based Control	217
9.7	Control Lyapunov Functions	222
9.8	Exercises	227
10	Robust State Feedback Stabilization	231
10.1	Sliding Mode Control	232
10.2	Lyapunov Redesign	251
10.3	High-Gain Feedback	257
10.4	Exercises	259

<i>CONTENTS</i>	ix
11 Nonlinear Observers	263
11.1 Local Observers	264
11.2 The Extended Kalman Filter	266
11.3 Global Observers	269
11.4 High-Gain Observers	271
11.5 Exercises	277
12 Output Feedback Stabilization	281
12.1 Linearization	282
12.2 Passivity-Based Control	283
12.3 Observer-Based Control	286
12.4 High-Gain Observers and the Separation Principle	288
12.5 Robust Stabilization of Minimum Phase Systems	296
12.5.1 Relative Degree One	296
12.5.2 Relative Degree Higher Than One	298
12.6 Exercises	303
13 Tracking and Regulation	307
13.1 Tracking	310
13.2 Robust Tracking	312
13.3 Transition Between Set Points	314
13.4 Robust Regulation via Integral Action	318
13.5 Output Feedback	322
13.6 Exercises	325
A Examples	329
A.1 Pendulum	329
A.2 Mass–Spring System	331
A.3 Tunnel-Diode Circuit	333
A.4 Negative-Resistance Oscillator	335
A.5 DC-to-DC Power Converter	337
A.6 Biochemical Reactor	338
A.7 DC Motor	340
A.8 Magnetic Levitation	341
A.9 Electrostatic Microactuator	342
A.10 Robot Manipulator	344
A.11 Inverted Pendulum on a Cart	345
A.12 Translational Oscillator with Rotating Actuator	347
B Mathematical Review	349

C Composite Lyapunov Functions	355
C.1 Cascade Systems	355
C.2 Interconnected Systems	357
C.3 Singularly Perturbed Systems	359
D Proofs	363
Bibliography	369
Symbols	380
Index	382
