The IEEE Computer Society Committee on Integrity was requested to conduct an investigation regarding the complaint you have filed against the authors of the following paper:

"CASER Protocol Enhancing Fake Content Delivery for Trace back Attack Avoidance in WSNs" in South Asian Journal of Engineering and Technology (SAJET) Vol.2, No.15 (2016) pp 116–123 R. Keerthanaa, J. Jeyarama

An ad hoc committee was formed to review the case. I recently received the report from this committee. The committee found level TWO plagiarism. Actions have been taken according to the regulations in section 8.2.4 of the IEEE Publication Services and Products Board Operations Manual, which is available at http://www.ieee.org/documents/opsmanual.pdf

We have notified the other publisher of this decision and requested that they remove the paper or add add a violation notice to the record in their website archives.

Best regards,
Dr. Alexander Serebrenik
IEEE Computer Society Integrity Vice-Chair
