

Steve Shaw is a University Distinguished Professor in the Department of Mechanical Engineering and Adjunct Professor of Physics and Astronomy at Michigan State University. He received an AB in Physics (1978) and an MSE in Applied Mechanics (1979) from the University of Michigan and a PhD in Theoretical and Applied Mechanics (1983) from Cornell University. His research interests are in applied dynamical systems and currently include micro/nano-scale resonators for sensing and signal processing applications and nonlinear vibration absorbers for automotive applications. He has held visiting appointments at Cornell University, the University of Michigan, Caltech, the University of Minnesota, the University of California-Santa Barbara, and McGill University. Steve currently serves as an Associate Editor for the *SIAM Journal on Applied Dynamical Systems* and *Nonlinear Dynamics*. His research has been supported by the NSF without interruption since 1984 and he has also been regularly funded by the Department of Defense and industrial sources. Steve is an ASME Fellow and recipient of the SAE Arch T. Colwell Merit Award, the Henry Ford Customer Satisfaction Award, the ASME Henry Hess Award, and the ASME N. O. Myklestad Award.
